Association of North Carolina Health and Science Libraries

The Association of North Carolina Health and Science Libraries was organized to promote excellence in health sciences information services. The organization fosters resource sharing, information exchange, continuing education and the professional development of the membership. ANCHASL provides a forum for networking and the exchange of ideas. ANCHASL serves as a liaison to organizations that seek input from ANCHASL members. Membership is open to individuals from all levels of professional practice.

Course Description

EBM: Introduction to study design and critical appraisal

Course Description: “This course is designed to give learners an introduction to critical appraisal skills through an understanding of basic study designs and validity issues related to reducing bias in clinical studies. The course will focus on understanding the basic study designs in medicine (case-control, cohort, randomized controlled clinical trial, systematic review, and meta-analysis). Learners will also discuss the criteria for determining internal validity of therapy studies and systematic reviews. After completing this course, learners will be better able to identify appropriate study designs, identify validity criteria, and help support evidence-based medicine within their own institutions. Teaching methods will include discussion, case studies, group exercises, and practice in appraising articles. “
